Twist Pack Plus

The ultimate packaging tube

TwistPack Plus

The one with the smart extras

The TwistPack Plus from rose plastic is the latest generation of our universal cylindrical packaging tube, designed for maximum product protection and easy handling. Our customers worldwide use TwistPack Plus as an universal protective packaging in a variety of markets.

Like many of our packaging solutions, TwistPack Plus is also available in 100 % recycled plastic (PCR).

The telescopic length adjustment of the TwistPack Plus allows quick and easy opening and closing - a click groove system avoids unintentional opening of the tube.

A PLUS FOR THE ENVIRONMENT

The use of recycled material for the production of packaging material reduces the use of fossil raw materials and lowers the energy demand at the same time. The recycled plastic is just as robust as new plastic. This means TwistPack Plus protects your products just as reliably as a comparable packaging solution made from regular plastic.

More safety.
More efficiency.

Colors, sizes, materials.

TwistPack Plus comes in PE, PP, PVC and 100% recycled material and is offered in a selected range of standard colors. Customized colors and individual corporate branding via printing is also available. The wide range of sizes covers almost any requirement. TwistPack Plus is available with an integrated hanger as well as middle parts on request.

Easy handling
