

LogisticBox

Transport box with handle for heavy items

Material

- Polypropylene (PP)
- Polypropylene made from 100% recycled plastic (rPP)

Product Range

- LB 185
 - Outer dimensions H x W x D
 - 18,5 x 21 x 15 cm
 - Inner dimensions H x W x D
 - 14 x 18 x 12,5 cm

Product features LogisticBox

- The LogisticBox is a sturdy, functional transport box specifically designed to meet the unique requirements of carbide scrap. It features a comfortable carrying handle for easy transport and offers ample protection against the extreme properties of carbide scrap
- The box's interior is additionally reinforced to prevent damage from the sharp-edged and heavy carbide material
- The box is equipped with a securely fitting lid that safely seals the scrap metal during transport
- The LogisticBox is made from robust PP (polypropylene) to ensure it can withstand the extreme weight and hardness of carbide scrap
- While the LogisticBox is ideal for transporting carbide scrap, its versatility also makes it suitable for a variety of other applications. Thanks to its sturdy construction, it is perfect for the safe transport and storage of various materials, providing a reliable solution in any environment
- Ergonomically shaped handle allows carrying the box close to the body, thus protecting the back
- The Logistic Box can be stacked and palletized both empty and full
- Individual customization through printing for clear organization
- Flexible fitting with inserts or foams possible, allowing it to be individually adapted for different applications
